- 🐙 [Github/mrmukto](https://github.com/mrmukto)
- in [LinkedIn/mrmukto](https://www.linkedin.com/in/mrmukto)

Methods, Techniques and Tools

★Android Studio ★Kotlin ★XML
★ Navigation component ★Fragmentation
★ Data Binding ★ Coroutines ★
★SharedPreferences ★Live data ★Firebase
★SQLite ★Room DB ★RxJava ★REST API
★ FCM push notifications ★ Service
★WorkManager ★Third-party Graph & Chart
libraries ★ VCS (GitLab, GitHub) ★ Hilt
★ Dagger ★ Bluetooth Manager ★ MQTT
★WebSocket ★ WebRTC

AREAS OF STRENGTH

- Android Application Development
- Data Storage and Management
- Asynchronous Programming and Concurrency
- Real-Time Communication
- Version Control
- Background Processing and Task Scheduling
- Dependency Injection
- Bluetooth and Connectivity Management
- User Interface Navigation
- Data Visualization
- Push Notifications and Real-Time Updates
- NFC (FeliCa) Integration
- Play Store Deployment and App Distribution

LANGUAGE

Bangla (Native speaker)
English (Good Communication Skills)

PROFILE

Experienced Android developer with over three years of expertise in Java, Kotlin, and Jetpack Compose, and regularly practicing Flutter for cross-platform development. Known for strong problem-solving skills and enhancing customer satisfaction, I contribute to successful project deliveries, improved efficiency, and high-quality code. Passionate and committed, I bring a get-it-done attitude to every task.

EXPERIENCE

September 1, 2020 – Present

Datasoft Manufacturing & Assembly Inc. Limited (DMA)

Address: Block #D, Level-7, House #84, 1 Rd 10, Niketan, Gulshan, Dhaka 1212

Software Engineer (Android)

- Design, develop, and maintain Android applications with a focus on user experience, functionality, and performance.
- Collaborate with team leaders and project managers to assess and understand client requirements.
- Stay current with the latest Android trends and technologies to enhance skills and improve project outcomes.
- Review and provide feedback on code written by team members before features are passed for QA and UAT.
- Develop technical solutions and actively participate in the development process with the team.
- Progress through the app development lifecycle, providing regular updates to the project manager.
- Identify and resolve project bugs, focusing on performance improvements and optimizations.
- Manage the publishing of apps on the Google Play Store and ensure continuous version maintenance and updates.

PROFESSIONAL PROJECTS

Security System (Surveillance & Security Management) 🔗

A mobile and web-friendly security platform designed to supplement night guards for businesses and homeowners.

Features:

- Real-time monitoring & incident reporting
- Emergency alarm control with two-way GSM communication
- Scheduled arming/disarming of devices
- Map-based status updates
- Wireless GSM with lithium-ion battery backup

Tech & Tools:

MVVM, Kotlin, Retrofit2 (REST API), FCM notifications, Services, Broadcast Receivers, Picasso, RecyclerView, CardView, Android Studio, XML, Firebase, SharedPreferences etc.

Clients: ACI (Shwapno), Agora, RFL.

Cashless Payment System

Introducing a seamless cashless payment solution with smart cards and POS terminals! Easily apply for your card through our user portal or mobile app. Our versatile card links directly to your bank account, other cards, or MFS services, providing instant transactions for bus fares, tolls, petrol stations, parking, and retail stores. Experience the convenience of cashless payments everywhere you go! Developed a loyalty and discount system using NFC smart cards.

Tech & Tools: MVVM, Java, Kotlin, NFC technology, Location service, FCM notifications, Service, Broadcast Receiver, REST API, Payment Gateway(bKash, SSL Wireless, amarPay)

Clients: Crimson Cup, JCX (Brew Splash), OtoMatic

FRAMEWORK & TOOLS

Android, Android Debug Bridge Manager (ADB), Android Virtual Device (AVD), Android Studio, Git, GitHub, Postman, XD, Figma

EDUCATION

BSc in CSE ■ Feb17–Aug21

Bangladesh University of Business and Technology, Dhaka, Bangladesh
CGPA: 3.60

PUBLICATION

Information-Based Mobile Application to Tackle COVID-19

Journal of Scientific Research and Reports, Pages 78-92,

[DOI: 10.9734/jsrr/2021/v27i130351](https://doi.org/10.9734/jsrr/2021/v27i130351)

TRAINING AND CERTIFICATION

Skills for Employment Investment Program (SEIP) ■ March-May - 2022

Pencilbox Training Institute.

Mobile Application Development-Android(Kotlin).

Professional English and Attitude Development ■ March - 2022

Pencilbox Training Institute.

Workplace Skills Development Academy New Zealand.

Skill Development for Mobile Game & Application ■ May-Nov 2018

ICT Ministry of Bangladesh.

Metro Rail Automatic Fare Collection & Refill System

- Designed and developed an NFC-based smart card recharge & balance update system for metro passengers.
- Users recharge via mobile app or website, with recharge info securely stored on a Top-up Server.
- At the metro station, passengers tap their NFC-enabled card on an AVM (Automatic Vending Machine).
- The AVM communicates with the server to validate, retrieve the latest recharge data, update the card balance, and display the new balance on-screen.
- Implemented security layers for fintech-grade payments, including secure transaction handling, encryption, and fraud prevention.
- Used Dependency Injection (DI) for scalable, testable architecture.

Tech & Tools: NFC (FeliCa), MVVM, Retrofit2 (REST API), DI (Hilt), Secure Payment Gateway Integration (SSL Wireless), FCM, Services, Broadcast Receivers, CMake, Android Studio (Kotlin + XML)

Clients: DTCA, DMTCL, Boston Consulting Group

Pond Management System : MoreFish🔗

The development of the mobile app will create a platform where the user will be able to see the current status of the pond (IoT-based app). It will help to maintain the optimum environment for fish health. It will monitor pH, Ammonia (NH3), TDS, Hardness, Temperature, and water chlorine and provide users with real-time updates.

Tech & Tools: MVVM Pattern, REST API, Retrofit2, Gson, Chart, FCM notifications, Service, Broadcast Receiver, Picasso, and Glide.Adapter, RecyclerView, CardView, Android Studio, XML, Firebase, Shared Preference, Android Studio, Kotlin, XML.

Loan Collection & Tracking System with Task Management

Loan Collection & Tracking System

Developed a mobile platform where territory officers collect loans and admins receive instant notifications of collections and bank deposits. The system maps officer routes with Google Maps, tracks activities from the admin view, and uses an MQTT broker for real-time location monitoring of field officers.

Asset Tracking & Task Management System

Built a solution to manage and track organizational assets and field tasks in real time. Admins can assign tasks, monitor progress, and track both officers and assets continuously. Integrated real-time tracking with an MQTT broker, ensuring accurate asset visibility and efficient task execution

Tech & Tools: MVVM Pattern, REST API, Retrofit2, Chart, Google Maps, Location service, Firebase, FCM notifications, Service, Broadcast Receiver, Picasso, Adapter, RecyclerView, CardView, Android Studio. Kotlin, XML
