PROFILE

Experienced Android developer with over three years of expertise in Java, Kotlin, and Jetpack Compose, and regularly practicing Flutter for cross-platform development. Known for strong problem-solving skills and a get-it-done attitude, contributing to successful deliveries, improved efficiency, and high-quality code.

AREAS OF STRENGTH

- + Android Application Development
- + Data Storage & Management
- + Asynchronous Programming & Concurrency
- + Real-Time Communication
- + Background Processing & Task Scheduling
- + Dependency Injection
- + Bluetooth & Connectivity Management
- + Data Visualization
- + Push Notifications & Real-Time Updates
- + NFC (FeliCa) Integration
- + Play Store Deployment & Distribution
- + Version Control

LANGUAGES

Bangla

Native speaker

English

Good communication skills

Experience

Software Engineer (Mobile App)

SEP 2020 — PRESENT

Datasoft Manufacturing & Assembly Inc. Limited (DMA) · Niketan, Gulshan, Dhaka

- Design, develop and maintain Android applications with a focus on UX, functionality and performance.
- Collaborate with team leaders and project managers to assess and understand client requirements.
- Review and provide feedback on team members' code before features pass to QA and UAT.
- Identify and resolve project bugs, focusing on performance improvements and optimizations.
- Manage Google Play Store publishing and ensure continuous version maintenance and updates.

Selected Projects

Security System — Surveillance & Management

A mobile and web-friendly security platform supplementing night guards for businesses and homes — real-time monitoring, incident reporting, emergency alarm control over two-way GSM, scheduled arming and map-based status updates.

stack MVVM · Kotlin · Retrofit2 · FCM · Services · Broadcast Receivers · Firebase

clients ACI (Shwapno) · Agora · RFL

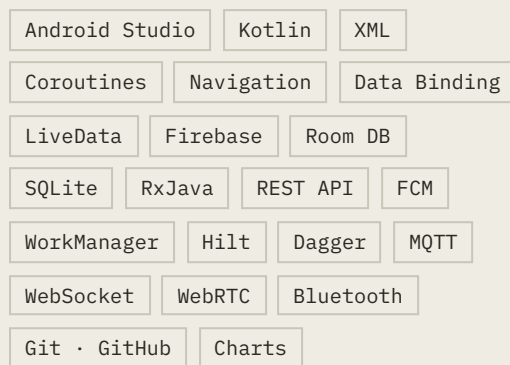

Goti — Battery Monitoring & Fleet

Real-time battery health, SOC/SOH tracking, payments and notifications for Rahimafrooz's connected vehicle ecosystem — dashboards for live metrics, activity alerts, asset tracking and subscription management.

stack Flutter · GetX · Dio (REST) · WebView · Maps

client Rahimafrooz (Bangladesh) Ltd.

METHODS & TOOLS

FRAMEWORK TOOLING

Android · ADB · AVD · Android Studio
· Git · GitHub · Postman · Adobe XD · Figma

EDUCATION

BSc in CSE

Bangladesh University of Business and Technology, Dhaka

FEB 2017 — AUG 2021 · CGPA 3.60

PUBLICATION

Information-Based Mobile Application to Tackle COVID-19 [↗](#)

J. of Scientific Research & Reports, pp. 78–92

DOI 10.9734/jsrr/2021/v27i130351 · Feb 2021

Cashless Payment System

A cashless payment solution with smart cards and POS terminals. Cards link to bank accounts, other cards or MFS for instant transactions across transit, tolls, fuel, parking and retail — plus an NFC-based loyalty and discount system.

stack MVVM · Java · Kotlin · NFC · Location · REST API · Payment Gateway (bKash, SSL Wireless, amarPay)

clients Crimson Cup · JCX (Brew Splash) · OtoMatic

Metro Rail Automatic Fare Collection & Refill

An NFC-based smart-card recharge & balance update system for metro passengers. Riders top up via app or web; at the station an AVM validates against the server, updates the card balance and displays it on-screen — with fintech-grade encryption, secure transaction handling and fraud prevention.

stack NFC (FeliCa) · MVVM · Retrofit2 · Hilt (DI) · SSL Wireless · CMake · Kotlin + XML

clients DTCA · DMTCL · Boston Consulting Group

Loan Collection & Asset Tracking Suite

A field-operations platform where territory officers collect loans and admins receive instant deposit notifications. Routes are mapped with Google Maps and officer/asset locations stream in real time over an MQTT broker, with task assignment and progress tracking from the admin view.

stack MVVM · REST API · Retrofit2 · Google Maps · MQTT · Charts · FCM · Kotlin + XML
